PROFESSIONAL SUMMARY

Power Platform Developer with 3.6 years of experience at Vision Group Retail, including 2 years of hands-on Power Automate (RPA) and Power BI development, building and owning production solutions for USA, APAC and LATAM clients (primary client: Store 360). Independently built and maintain a production Allocation Automation system using Power Automate Desktop flows triggered from cloud flows (95% accuracy, about 30 minutes saved daily, 10 months in production). Built a Leave Management app in Power Apps with automated approval workflows, and Power BI MBR dashboards used by senior management. Strong foundation in Dataverse and SharePoint data sources.

TECHNICAL SKILLS

Power Automate (Advanced): Cloud flows, Power Automate Desktop (RPA), approval workflows, scheduled and triggered flows, SharePoint, Teams, Outlook and Excel integration

Power Apps: Canvas apps, Model-driven apps, Dataverse, SharePoint data sources, Power Automate integration

Power BI (Advanced): DAX measures, Power Query (M), data modeling, KPI and executive dashboards, scheduled refresh

SQL: SELECT, WHERE, JOINs, GROUP BY, aggregate functions, window functions (LEAD, LAG), CTEs, data validation queries

Excel (Advanced): Advanced formulas, Excel Macros (VBA), pivot tables, Power Pivot, data cleaning and validation

Other: Workflow automation, process improvement, AI model performance evaluation, Microsoft 365, SharePoint, Teams

WORK EXPERIENCE

Process Associate — Vision Group Retail **Nov 2022 – Jun 2026**

Nagercoil, Tamil Nadu | Clients: USA, APAC and LATAM regions; primary client: Store 360

- **Power Automate:** Independently built a live Allocation Automation system: desktop flows in Power Automate Desktop (RPA), triggered from cloud flows.
- Reached 95% automation accuracy, saving about 30 minutes every working day (around 11 hours a month), live in production for 10 months.
- Connected Excel, Outlook, Microsoft Teams and SharePoint into one automated pipeline with real-time data sync and approval workflows.
- **Power BI:** Built Monthly Business Review (MBR) dashboards from 4+ data sources with DAX and Power Query; now the primary reporting tool for senior management, with automated scheduled refresh.
- **AI Model Performance:** Checked and evaluated new and existing AI models through training data validation and output quality review.
- **Data Validation & Reporting:** Analyzed and validated client datasets using Excel and SQL, and prepared structured reports for regional clients and management.

PROJECTS

Allocation Automation System — Power Automate Desktop (RPA) & Cloud Flows Live in Production, 10 Months

- Hybrid RPA solution: desktop flows called from cloud flows; removed manual handoffs between teams.

Leave Management System — Power Apps & Power Automate Independent Project, 2026

- Built a leave management app in Power Apps with automated approval workflows in Power Automate, replacing manual leave request handling.

MBR Executive Dashboard — Power BI (DAX, Power Query) Used by Senior Management

- Consolidated 4+ data sources into one dashboard for monthly trend and cross-unit performance review; automated refresh cut monthly report preparation and removed manual errors.

EDUCATION

Master of Engineering (M.E.) — Satyam College of Engineering, Aralvaimozhi | CGPA: 8.1/10 2023 – 2025

Bachelor of Engineering (B.E., Lateral Entry) — University College of Engineering, Nagercoil | CGPA: 7.89/10 2018 – 2021

CERTIFICATIONS

- AI and Machine Learning for Business Applications — Alison
- SQL for Data Management Using AI — be10X (AI Career Accelerator Program), July 2026
- AI Fundamentals & Ecosystem Mastery — be10X (AI Career Accelerator Program), July 2026
